

LETTER OF RECOMMENDATION

I am **Joshnavi Kambham** tech lead from Auro Pro Soft Systems Private Limited. I am using this letter to recommend one of my hard-working employees from my team Ms. Abbavaram Susmitha. I have worked closely with her during the past three years that she has served as a Software Engineer at Trane Technologies. She produces a high volume of work while consistently maintaining high standards for quality and accuracy.

Susmitha is a student at India's prestigious Vellore Institute of Technology, Vellore. She is a self-motivated person and always helping others. In the initial days of her joining, during her internship she used to interact with the team members and learn from them how to solve difficult tasks. This attitude made her understand the difficulty of the task and applied her theoretical knowledge to practical situations.

I volunteered to write this recommendation for Susmitha because I am grateful for her contributions to our company and assure her that she can learn things easily. Her persistent dedication to the task and the skill to keep composure under demanding circumstances gives her an edge over her teammates.

Personally, I feel she always tries to complete her task on time by keeping extra effort and working for more than eleven hours at times in order to avoid escalations. I feel pleasure to be associated with her and wish her good luck to succeed in her academics. So, I strongly recommend her admission to the graduate program.

Sincerely,

Joshnavi Kambam
Tech Lead
